

TOUCHPOINT NETWORKS HELPS KING CITY CIVIC ASSOCIATION **UNITE THE COMMUNITY**

*Leading Business Technology Provider
Uses Technology to Streamline
Communication*

PORTLAND, OR – September 18, 2018 - TouchPoint Networks, a leading provider of unified communications, announced today that the company has recently deployed a complete unified communications solution with the King City Civic Association. The King City Civic Association is responsible for the success of a planned community for 55+ with an active lifestyle. Clustered along the community's cul-de-sacs and thoroughfares are 643 single-family homes on low maintenance lots that allow residents to focus on enjoying their lives to the fullest. TouchPoint implemented a new cabling infrastructure, WiFi and the Zultys Cloud voice solution for the King City Civic Association.

“Community is all about bringing people together,” states Gary Gonzalez, President of TouchPoint Networks. “Our technology solutions facilitate exactly that aim. Whether we’re working with a Fortune 500 company, a small business or an organization like King City, it’s all about bringing the community closer together and finding new ways to collaborate. We’re excited to see how the residents utilize the advanced technology we’ve deployed and how it makes everyone’s lives more enjoyable.”

The King City Civic Association is dedicated to keeping their residents focused on the joys of life and one of their chief objectives was to innovate and find better ways to communicate with their community. They have done so by investing in a new WiFi solution that supports both the office and the residents in the main building. The main building hosts events and groups, and the availability of WiFi will add a new dimension what the groups and events can provide for the community.

Additionally, with many residents spending plenty of time at the golf pro shop, the King City Civic Association saw this as another opportunity to increase community building through technology. TouchPoint Networks also installed new WiFi in the golf pro shop for the benefit of all residents and guests alike. Furthermore, the association saw that technology has been shifting to the Cloud and recognized the benefits of having a Zultys Cloud voice solution where they would no longer need to maintain expensive hardware or keep it up to date. This investment will no doubt yield plenty of return in the years to come, while improving the capabilities of staff members as well.

“We really respect what they’re doing,” added Gonzalez. “It’s such a pleasure to work with

an organization that is bringing so much good to our community. We’re honored to be working with them and consider it a privilege.”
